

CASE HISTORY # 125

PROJECT:
PRIVATE RESIDENCE
BOUNTIFUL, UT

DATE:
SPRING 2010

North America's premier waterproof vinyl flooring systems. Since 1974

PROBLEM:

The deck on this home served as both an elegant entry to the home as well as provided a large storage area. Due to improper waterproofing the substrate had been water damaged to the point of having to be completely replaced. The homeowners wanted a product that would look great but also provide waterproofing to protect the structure and storage underneath.

DURADEK SOLUTION:

With the entryway being a focal point of the home, Duradek Classic Sandstone was chosen for its durability and low maintenance. What drew the homeowner to Duradek was the proven history of the Duradek membrane and the simple cleaning steps. Now they have a great looking feature to their home with the piece of mind that they won't have to go through the expensive repair process again.

JOB NOTES:

Located on the "bench", this deck in front of the home has added a real touch of class and is a neighbourhood eye catcher.
